

# ALPATSON COBBINA SIAW

+33 7 80 78 24 53 | cobbinaalpatson@gmail.com | Lille, France | [linkedin.com/in/alpatson-cobbina-siaw/](https://linkedin.com/in/alpatson-cobbina-siaw/) | [github.com/ALpatson](https://github.com/ALpatson) | [alpatsonportfolio.vercel.app/](https://alpatsonportfolio.vercel.app/)

Expected Graduation: December 2027 | Available: 26 weeks internship, Summer 2027 (May-October) | Preferred Location: Paris, France

## PROFESSIONAL SUMMARY

---

Software Engineering Master's student with hands-on experience in Python, Java, and JavaScript through AI research and production software projects. Experienced applying data structures, algorithms, and software engineering principles to real-world problems, building and deploying web applications, and working with Linux-based systems. Built and maintain a live commercial platform end to end, including backend services, databases, APIs, deployment, and production maintenance. Experienced evaluating AI/ML approaches through practical benchmarking and interested in building reliable, scalable software systems across Software Engineering and Site Reliability Engineering.

## EDUCATION

---

**JUNIA ISEN, Lille, France**  
*Master's, Software Engineering*

**September 2025 - December 2027**

**Kwame Nkrumah University of Science and technology, GHANA**  
*Bachelor's, Computer Engineering*

**January 2022 - February 2027**

## PROFESSIONAL EXPERIENCE

---

**Université de Mons**  
*AI Research Engineer Intern*

**May 2026 - August 2026**  
*Belgium*

- Developed a rule-based decision-routing system that classified free-text user requests into canonical categories, applying structured decision logic to route requests to the appropriate processing workflow.
- Benchmarked AI/ML tools against simpler baselines on real usage data, using comparative evaluation to determine which approaches provided meaningful improvements before integration.
- Diagnosed and resolved a recurring application crash and five architectural bugs through systematic reproduction, before/after testing, and root-cause analysis across a multi-module codebase.
- Developed internal tooling to track the status, calibration results, and test coverage of a 17-mission system, providing the team with ongoing visibility into system health and progress.
- Used Git branching and pull requests throughout development and maintained technical documentation across all 17 missions, communicating technical findings and trade-offs as actionable recommendations to a non-technical supervisor.

## SKILLS & INTEREST

---

- **Programming Languages:** Python, Java, JavaScript, SQL
- **CS Fundamentals:** Data structures and algorithms, object-oriented design, Adobe After Effects, software engineering
- **AI/ML:** Model benchmarking and evaluation, model selection and routing, LLM
- **Web Development:** Django, React.js, Node.js, REST APIs
- **Databases:** Postgres, MySQL
- **Tools & Practices:** Git, GitHub Actions, SDLC, Technical documentation
- **Other:** Linux/Unix, Bash, Agile
- **Languages:** French, English
- **Interests:** Chess (competitive, former club president)

## PROJECTS & OUTSIDE EXPERIENCE

---

**Pin and Codes Store**

**November 2025 - May 2026**

- Own and operate a live Django/PostgreSQL e-commerce platform, handling backend development, REST APIs, Mobile Money payment integration, production deployment, and ongoing maintenance. ([pinandcodes.store](https://pinandcodes.store))

**Inventory & Sales Management System (SmartShops)**

- Built a Django/PostgreSQL inventory and sales system with REST APIs and data pipelines tracking sales and stock events, with dashboards for operational KPIs and low-stock alerts.

**Appointment Booking System (QueueSmart)****December 2025 - February 2026**

- Built a Python/Django booking and queue management system with JWT authentication and role-based access control for client, staff, and administrator workflows.

**Text-Based Fantasy RPG Game****October 2025 - November 2025**

- Developed a Java object-oriented game engine using inheritance, polymorphism, encapsulation, and modular class design.

**CERTIFICATIONS**

---

- Mastering Software Architecture Patterns and System Design
- AWS Foundations of Prompt Engineering
- ALX Professional Development Skills for the Digital Age
- IBM Prompt Engineering for Everyone

**LEADERSHIP**

---

- KNUST Chess President
- Computer Engineering Sports head

**January 2023 - September 2025****August 2023 - August 2025**
