PROFESSIONAL SUMMARY

Software Engineering Master's student with full-stack development experience across React, Django, and Node.js, supported by a strong foundation in Java, Python, and object-oriented programming. Skilled in building practical software solutions, including backend services, REST APIs, user-facing applications, and internal tools. Experienced in taking projects from concept to deployment, translating user needs into technical requirements, and maintaining reliable, maintainable software. Particularly interested in backend engineering, API development, and scalable software systems.

EDUCATION

JUNIA ISEN, Lille, France **September 2025 - December 2027**
Master's, Software Engineering

Kwame Nkrumah University of Science and Technology, Ghana **2022 - 2025**
Bachelor's, Computer Engineering

PROFESSIONAL EXPERIENCE

Université de Mons **May 2026 - August 2026**
AI Research Engineer Intern *Belgium*

- Built and shipped internal tooling that the research team used directly to track a 17-mission system's status, calibration results, and test coverage, turning a manual tracking process into something the team could just look at.
- Built a rule-based decision-routing system directing free-text user requests to the correct handler among several canonical categories.
- Rigorously tested and evaluated AI/ML tools before adopting them, comparing models against simpler baselines on real usage and measuring actual impact rather than trusting vendor claims.
- Diagnosed and resolved a repeated application crash and five recurring architectural bugs through systematic before/after testing rather than guesswork.
- Wrote continuous technical documentation across all 17 missions and communicated findings and trade-offs directly to a nontechnical supervisor as plain, actionable recommendations.

SKILLS & INTERESTS

- **Programming Languages:** Python, Java, JavaScript, SQL
- **Frontend:** React.js, HTML/CSS
- **Backend & APIs:** Django, Node.js, REST APIs
- **Databases:** PostgreSQL, MySQL
- **Tools & Practices:** Git, GitHub Actions, Code review, Agile workflows, Technical documentation, Strong OOP foundation, comfortable picking up new languages
- **Languages:** English (fluent), French (intermediate)
- **Interests:** Chess (competitive, former club president)

PROJECTS & OUTSIDE EXPERIENCE

Web Application Development Project, Miss Library - Junia **October 2025 - November 2025**

- Backend lead on a full-stack library management system (NestJS, React, PostgreSQL) built with a team as part of the Master's curriculum; designed the REST API and database schema that the React frontend consumed.

Pin and Codes Store **November 2025 - Present**

- Own and operate a live Django/PostgreSQL e-commerce platform, handling backend development, REST APIs, Mobile Money payment integration, production deployment, and ongoing maintenance. (pinandcodes.store)

Inventory & Sales Management System (SmartShops)

- Built a Django/PostgreSQL inventory and sales system with REST APIs and data pipelines tracking sales and stock events, with dashboards for operational KPIs and low-stock alerts.

Appointment Booking System (QueueSmart) **December 2025 - February 2026**

- Built a Python/Django booking and queue management system with JWT authentication and role-based access control for client, staff, and administrator workflows.

Text-Based Fantasy RPG Game **October 2025 - November 2025**

- Developed a Java object-oriented game engine using inheritance, polymorphism, encapsulation, and modular class design.

CERTIFICATIONS

- Mastering Software Architecture Patterns and System Design
- AWS Foundations of Prompt Engineering
- ALX Professional Development Skills for the Digital Age
- IBM Prompt Engineering for Everyone

LEADERSHIP

- KNUST Chess President **January 2023 - September 2025**
- Computer Engineering Sports Head **August 2023 - August 2025**
